CHARLOTTE, NC 28277  
UNITED STATES

Dear BILL:

Congratulations! On behalf of Novell Education, I am pleased to grant you the title of:

### **Certified Novell Administrator (CNA)**

Your efforts to achieve specialized IT knowledge and skills will give you a great head start in the IT industry. As with all of Novell certifications, the CNA certification is recognized by both employers and IT professionals throughout the world because it proves you understand fundamental network administration principles.

Now that you are a CNA, visit the CNA section of CNE Net, a Web site designed especially for Novell certified professionals. This secure Web site offers you many of the benefits associated with being a CNA, such as CNA logos and discounts on Novell products. It also contains the latest technical and product information, patches, private forums, and new training and certification opportunities. Most importantly, CNE Net contains information about your current status as a CNA. Please check this status periodically and keep your contact information updated!

To access CNE Net, go to <http://cnenet.novell.com> and enter your confidential Novell Certification ID in the "User Name" field and personal identification number (PIN) in the "Password" field:

**Certification ID: 9738467**

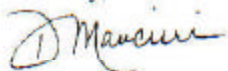

**PIN: 1917**

*\*\*\* This is your personal Novell identification information.  
Please keep this document in a safe place! \*\*\**

In addition to becoming a CNA, you're well on your way to becoming one of the industry's most respected and well-paid IT individuals: a Certified Novell Engineer (CNE). CNEs are extremely effective at managing network environments and improving an organization's overall network efficiency. Demand for CNEs continues to skyrocket because they understand how to design, implement and troubleshoot enterprise-sized networks, and provide high-end, solutions-based technical support. If you'd like more information on becoming a CNE, visit <http://education.novell.com/cnc>.

Your commitment to Novell Education's certifications, as well as your dedication and effort to earn this certification, is greatly appreciated. On behalf of Novell Education, I wish you great success as a CNA!

Sincerely,

Debbie Maucieri  
Vice President  
Novell Education

### KEEP THIS REPORT FOR YOUR RECORDS

You gave incorrect responses to one or more questions from the following objectives:

- Identify the Features of NetWare
- Identify How Application Launcher Leverages NDS
- Identify the Actions and Rights Needed to Grant Access to NDS Resources
- Identify Workstation Software and Its Function
- List the Configuration Options for Novell Client and Windows
- Identify Network Resources
- Identify Which Utilities Manage Files
- Identify Guidelines for Planning and Creating Custom Volume in the Network File System
- List the System-Created Directories and Identify Their Contents and Functions
- Identify How File System Security Works
- Design Login Scripts for containers, Groups, and Users
- Configure the MAP Command in Login Scripts
- Determine Administrative Roles and Rights Assignments
- Configure the Network for NDPS

If you need to retake the test, please remember that different objectives may be tested next time.
